LONDON RHINOPLASTY COURSE

6th to 7th November 2026

Dissection Lab 5th Nov 2026

Royal Society of Medicine, London, UK

TECHNIQUES IN RHINOPLASTY WITH AN INTERGRATED ENT-PLASTICS APPROACH

Welcome

Dear Colleagues,

It is with great pleasure that we welcome you to the **London Rhinoplasty Course**, which is being held in association with the **British Association of Aesthetic Plastic Surgeons** (BAAPS), **European Academy of Facial Plastic Surgeons** (EAFPS) and **ENT UK**.

Day 1: Dissection in the lab with Faculty demonstrating anatomy for **Rhinoplasty, Face Surgery and Eye Anatomy** Step-by-step

Day 2: Lectures and Fast Panel discussion.

Day 3: Lectures and Pearls from the Masters.

Your CPD certificate will be emailed to you. The course has been certified for 12 CME points.

Santdeep Paun
Consultant Facial Plastic
Surgeon, London

- 16.20 – 16.30 **Prof Hesham Saleh** - Reflections on Rhinoplasty
- 16.40 – 17.00 Panel Debate Interactive Presentations**
- 16.40 – 16.45 **Spreader Grafts - Does Everyone Need them?**
- 16.45 – 16.50 **Batten v Strut**
- 16.50 – 17.00 **Controlling tip Position - SEG v Strut v Sutures**

Exhibitor Profiles

CareBit

Carebit is the practice management platform trusted by over 1,000 private healthcare professionals across the UK, from solo consultants to leading surgical clinics.

Carebit brings every part of running a practice onto one platform. AI-powered dictation and transcription lets surgeons produce and send patient letters in minutes, not hours, complete with attachments, test results and secure delivery to GPs and other consultants. Automated invoicing and full Healthcode integration for insurance billing help practices get paid faster and reduce bad debt, while a powerful calendar and online booking system keep clinics running smoothly, in and out of hours. A branded patient portal lets patients register, book, pay and access their letters and results securely online, giving practices a modern, professional experience patients notice.

Carebit processes over £200 million a year for its customers, all protected by bank-grade encryption, GDPR compliance and Cyber Essentials Plus certification. Every practice is backed by a UK-based support team who work in partnership with clinicians and practice staff to help them save time, improve cash flow and grow with confidence.

Less admin. More time with patients.

**FIRST
MEDICAL
INDEMNITY**

First Medical Indemnity

Unlike many insurance providers, FMI is a Coverholder at Lloyd's and a Managing General Agent (MGA). This means we have delegated authority to underwrite policies on behalf of certain underwriters at Lloyd's. With delegated authority from certain underwriters at Lloyd's, we can shape your cover directly, respond faster, and provide flexibility that a standard broker simply cannot. With FMI, you're dealing with the team, who actually designs and manages your protection.

Our leadership team brings decades of experience from across the healthcare and insurance sectors – with a history of building successful medical indemnity providers to leading global healthcare organisations such as Bupa. That experience means we understand both the clinical realities and complex risks doctors face in private practice.

Acteon Group

Today the Acteon® Group is pleased to announce the official unveiling of The New Acteon®, a multi-year transformation initiative which sets the direction for the Group over the next decade.

Building on more than 70 years of success serving healthcare professionals with leading brands Pierre Rolland, Satelec, Sopro, DeGötzen, Owandy, and Prodont Holliger, the Acteon® Group has entered a new accelerated phase of innovation, expansion, and digitalization for the benefit of its customers worldwide.

The New Acteon® is being brought to life by more than 800 dedicated and passionate colleagues around the world, serving hundreds of thousands of care providers and more than one hundred million patients per year.

Hospital Innovations

Hospital Innovations is a trusted leader in surgical solutions, specialising in cadaveric costal cartilage available in both frozen and saline-preserved formats. We also supply a wide range of high-quality allograft products, including fascia and decellularised dermis, to support complex reconstructive and aesthetic procedures. In addition to biologics, we are proud distributors of the Acteon and W&H Piezotome system, featuring rhinoplasty-specific tips designed for ultra-precise osteotomy and bone work.

Looking ahead, we're preparing to launch our innovative pre-diced costal cartilage, conveniently pre-loaded in syringes to streamline surgical prep and improve consistency. We're actively inviting clinician feedback to help shape this exciting new product.

At Hospital Innovations, we're dedicated to delivering high-quality, innovative solutions that meet the evolving needs of modern surgery.

Sonos, Turkey

Innovating in close partnership with surgeons leads to advancements that truly meet their needs. By collaborating directly, we can understand their challenges, refine techniques, and develop tools that enhance patient outcomes. This synergy not only drives innovation but also fosters a culture of continuous improvement in surgical practices.

Serving surgeons with high standards is essential for ensuring that they have the tools and support necessary to perform at their best. By maintaining rigorous quality controls and prioritizing reliability in our products and services, we empower surgeons to focus on what matters most: delivering exceptional care to their patients. Our commitment to excellence not only strengthens their confidence but also contributes to better surgical outcomes overall.

Latera

The LATERA nasal implant is used to support upper and lower lateral cartilage in the nose, reinforcing the nasal wall like traditional cartilage and polymer grafts. Supporting the cartilage in this manner may reduce nasal airway obstruction symptoms and help patients breathe better.

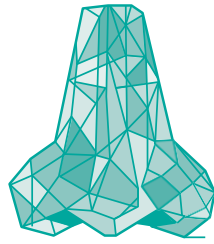

The LATERA implant supports the upper and lower lateral cartilage by anchoring above the maxilla to provide cantilever support.

Stryker is one of the world's leading medical technology companies. Alongside our customers around the world, we impact more than 150 million patients annually.

The goal of Stryker ENT is to offer innovative technology for treatments of chronic and recurrent diseases of the ear, nose and throat. We deliver solutions that support both advanced and minimally invasive procedure needs, and our portfolio offers innovative treatment options to your patients and flexibility of procedural environment to you.

From quality to training and education to continued investment in clinical research, we're always here to help you increase your knowledge, expand your offerings with proven technologies, and improve patient experiences.
